ANODE | 24h

mVa PROFITO | Product

Rapid, real-time anomaly detection, enabling quick adjustments for efficiency and productivity gains!

- Up to 48 routes and 48 pots per route
- Up to 6 anodes per pot
- Configured to easily integrate into your systems
- Allows data retention for reliable and efficient analysis

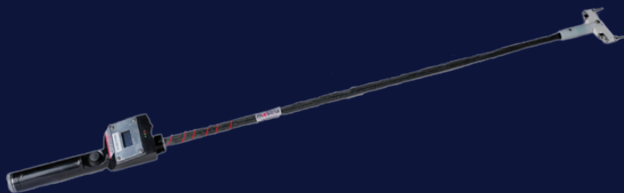

Proven to increase current efficiency — by 1% or more, in many cases, for significant gains.

Helps improve operational robustness and reduces ACD variation rates.

Unique and revolutionary tool. No comparable product worldwide!
